

Disclosing Tablets

from Halewood Health UK

Plaque is a sticky colourless deposit on teeth in which bacteria constantly forms. In order to keep gums and teeth healthy, plaque must be removed frequently and thoroughly.

Halewood's disclosing tablets contains disclosing agent which reveals old and new plaque. The red residual deposits indicate new plaque whilst the blue residual deposits indicate older plaque.

Key Features:

- Identifies and stains plaque left behind
- Differentiates NEW and OLD plaque

Key Benefits:

- Encourages good brushing techniques
- Improves dental hygiene
- Economical and quick to use.
